

Gain confidence and optimize performance in key areas of pharmacy risk and compliance

Compliance solutions from Visante will help you reach your compliance goals in key areas most vulnerable to external review

Compliance requirements for pharmacy are extensive and growing. Multiple federal and state agencies, governing bodies and accrediting entities impose strict standards and guidelines that evolve quickly. Visante's experts are prepared to give you confidence in key areas of compliance that pose significant organizational risk.

Expertise in pharmacy compliance

A high-performing pharmacy organization is cognizant of and works to support optimal compliance throughout. In fact, pharmacy drives compliance for many areas of a hospital or health system and can greatly impact financial performance, patient care and safety for everyone in the organization. Visante uses a whole-pharmacy assessment process to uncover risk points, identify areas for improvement and implement long-lasting solutions in three of the most vulnerable compliance areas for hospitals and health systems.

Excellent compliance positions in these areas of high risk for pharmacy are paramount to a high-performance organization. We work closely with clients to help them achieve and sustain compliance confidence. ”

Jim Jorgenson, CEO
Visante

340B Program Compliance and Optimization

Visante's experts bring commitment and experience that gives you confidence in your 340B compliance. We have conducted audits of thousands of contract pharmacies and virtually every type of covered entity, and we have expertise with all split-billing platforms. Our team stays on top of evolving regulations, providing the most up-to-date expertise and information.

Sterile and Non-sterile Drug Compounding

Our specialized drug compounding consultants each bring deep expertise to your organization to elevate your practice so you provide the highest quality medications to patients in a way that optimizes safety for patients, providers,

staff and the community at large. We help you quickly and efficiently achieve compliance with USP, DEA, FDA, OSHA, NIOSH, EPA and State Boards of Pharmacy requirements around both sterile and non-sterile compounding for both hazardous and non-hazardous medications.

Drug Diversion Prevention and Mitigation

Every single hospital and health system in the U.S. is at risk for drug diversion. The solution requires a multidimensional, multidisciplinary approach that identifies and minimizes risk through a collaborative and comprehensive program including pharmacy, nursing, informatics/automation, human resources and security experts. Visante will help you create a program and when necessary will help you mitigate existing diversion concerns and minimize future harm.

We help high-performing pharmacy organizations excel in all areas of compliance.

Visante will prepare you for compliance regulations, requirements and standards set by state and federal agencies and other interests. We bring deep expertise to your organization in all areas, including: **HRSA, OPA, DEA, USP, FDA, CMS, State Boards of Pharmacy, pharmaceutical manufacturers, TJC, DNV, URAC, ACHC, NABP and more.**

»» **Uncover critical safety risks**

Constantly changing regulations make it difficult for most pharmacy organizations to stay current with their practices. Visante's consultants comes alongside your team to partner with them to achieve compliance. We find that our client's internal staff greatly value our support and best practices.

»» **Partner with the best in the business**

Visante's subject matter experts bring years of experience with many different types and sizes of clients and we hit the ground running. Our team is comprised of some of the most respected experts in their fields so you can feel confident knowing you have industry experts on your team.

»» **Improve compliance and performance**

When your organization is operating at its best in terms of compliance, you will provide extraordinary care to patients. You will also avoid unnecessary costs or the untimely shut down of service areas due to compliance failures.
